AMSFS-CCA-I

DISTRIBUTION To Whom It May Concern

SUBJECT: Letter of Authorization for Plexus Scientific Corporation

1. Plexus Scientific Corporation (Plexus) was awarded contract DAAA09-02-D-0009/0002 in September 2003 to produce a data management tool that will improve the Army's ability to manage its low-level radioactive waste. Period of performance for this effort ends September 2004. This project requires the collection and consolidation of various existing information on a myriad of Army inventory items containing radioactive materials. This data management tool will help the Safety Rad/Waste Office (AMSFS-SF, RIA) to make informed decisions on current and future waste storage, treatment, transportation and disposal issues. USAMC RSO has requested all Army Organizations and their respective sections to support this project by providing technical information and assistance concerning low-level radioactive materials and waste to Plexus Scientific Corporation during the development of the database.

2. This letter serves as an acknowledgement that Plexus is a valid US government contractor requiring access to Army systems for the purpose of collecting information necessary to populate a low-level radioactive materials database for AMSFS-SF use. Plexus will only require access to unclassified information to include Sensitive But Unclassified (SBU) and For Official Use Only (FOUO) information.

3. Mr. Karl Boggs, Plexus Scientific Corporation, and project leader, may contact your organization for support of this tasking. Mr. Karl Boggs may be reached at (757) 431-1470 or email [kboggs@plexsci.com](mailto:kboggs@plexsci.com).
