Protimeter® Digital Mini Wood Moisture Meter

Digital LCD indicates wood moisture from 8% to 28% in 0.1% units. Readings above 28 indicate increasing levels of high moisture and are not moisture content percentages. Lights indicate relative moisture conditions for brick, plaster, concrete. Green = safe, yellow = investigate, red = corrective action needed. Push button switch automatically powers off ten seconds after release. Supplied with extra 1/2" probes and cable, belt case, calibration chart, and one 9V battery (included).
